

# FLEXIBLE SUPPORT PACKAGES

OUR LIFE'S  
PURPOSE IS TO  
EMPOWER YOURS

Education  
and Training

The Flexible Support Package (FSP) scheme aims to provide responsive, short-term support for a child with complex trauma that presents with extreme behaviours. This support is granted for up to 10 weeks from the Department of Education.

FSPs seek to achieve this through a range of available supports, such as targeted specialist support that builds the capability and capacity of early childhood teaching teams to address the specific child's needs.

## **At Access Your Supports, we can support your FSP funding through:**

Trauma coaching and behaviour support with a child centred focus, building trust and safety within repairing relationships with the child and their educator(s).

We will provide support via our **Early Childhood Early Intervention Team** to have...

- 3 hours of support each week over a maximum of 10-week period (breaks can be taken over the term holidays)
- Face to face support with the child
- Debrief/discussion with the child's educator about supports recommended and how this could be implemented
- Resource creation, strategy detailing and reporting, contact and administration time

We will act as a short-term support while longer-term program supports are applied for and arranged to stabilise the child's enrolment and attendance in the kindergarten program.
